DATE MAILED: 07/14/2004

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary

Application No.

09/740,808

Applicant(s)

PINKUS, RON

Examiner

Andrew J. Fischer

Art Unit

3627

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 14 April 2004.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-13 is/are pending in the application.
- 4a) Of the above claim(s) 11 is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-10, 12 and 13 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
 - ☐ Certified copies of the priority documents have been received in Application No. _____.
 - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Acknowledgements

1. Applicant's amendment filed April 12, 2004 is acknowledged. Accordingly, claims 1-13 remain pending with claim 11 withdrawn from consideration in the Office Action mailed October 31, 2003. Election was made without traverse.
2. This Office Action is written in OACS. Because of this, the Examiner is unable to control formatting, paragraph numbering, font, spelling, line spacing, and/or other word processing issues. The Examiner sincerely apologizes for these errors.

Claim Rejections - 35 USC §102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. §102 that form the basis for the rejections under this section made in this Office Action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States. . . .

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

4. Claims 1-10, 12, and 13 are rejected under 35 U.S.C. §102(b) as being anticipated by Oberrecht et. al. (U.S. 5,605,182)("Oberrecht"). Oberrecht discloses a system with a plurality of fuel dispensers (12) each having at least one antenna (78), a controller (40), a point of sale computer (inherent since a fuel transaction occurs); a tag interrogator (52), customer ID (inherent); and data is written to the tag (inherent since it has to be identified).

Art Unit: 3627

5. Claims 1-10, 12, and 13 are also rejected under 35 U.S.C. §102(e) as being clearly anticipated by Janning et. al. (U.S. 6,446,049 B1)("Janning").

Claim Rejections - 35 USC §103

6. The following is a quotation of 35 U.S.C. §103(a) which forms the basis for all obviousness rejections set forth in this Office Action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claims 4 and 8 are alternatively rejected under 35 U.S.C. §103(a) as being unpatentable over Oberrecht.¹ It is the Examiner principle position that claims 4 and 8 are anticipated because of the inherencies noted above. However if not inherent, it is now admitted prior art that POS systems store frequent purchase information and that transactions are authorized by a personal identification numbers (PIN).

Therefore if not inherent, it would have been obvious to one having ordinary skill in the art at the time the invention was made to modify Oberrecht to include frequent purchase information and the capability to authorize transactions by a personal identification numbers (PIN). Such a modification would have rewarded return customers and would have helped prevent fraudulent transactions.

¹ See MPEP §2112 expressly authorizing alternative §102/§103 rejections when the question of inherency is present in the anticipation rejection.

Art Unit: 3627

8. Since Applicant did not seasonably traverse the Official Notice statements as stated in the previous Office Action (mailed October 31, 2003; Paragraph No. 11), the Official Notice statements are taken to be admitted prior art. See MPEP §2144.03.

9. With respect to the pending claims, the Examiner respectfully reminds Applicant that: "A system is an apparatus." *Ex parte Fressola* 27 USPQ2d 1608, 1611 (B.P.A.I. 1993)(citations omitted). Additionally, "[c]laims in apparatus form conventionally fall into the 35 U.S.C. §101 statutory category of a 'machine.'" *Ex parte Donner*, 53 USPQ2d 1699, 1701 (B.P.A.I. 1999)(unpublished), (Paper No. 34, page 5, issued as U.S. Patent 5,999,907). Therefore, it is the Examiner's position that Applicant's system claims are "product," "apparatus," or more specifically, "machine" claims.²

10. Functional recitations using the word "for," "adapted to," or other functional terms (*e.g.* see claim 1 which recites "adapted to read information from a tag connected to a vehicle") have been considered but are given little patentable weight³ because they fail to add any structural limitations and are thereby regarded as intended use language. A recitation of the intended use in a product claim must result in a structural difference between the claimed product and the prior art in order to patentably distinguish the claimed product from the prior art. If the prior art structure is capable of performing the intended use, then it reads on the claimed limitation. *In re Casey*, 370 F.2d 576, 152 USPQ 235 (CCPA 1967) ("The manner or method in which such machine is to be utilized is not germane to the issue of patentability of the machine itself."); *In re*

² Products may be either machines, manufactures, or compositions of matter. MPEP §2106 IV B. 2 (a).

³ See *e.g. In re Gulack*, 703 F.2d 1381, 217 USPQ 401, 404 (Fed. Cir. 1983)(stating that although all limitations must be considered, not all limitations are entitled to patentable weight.).

Art Unit: 3627

Otto, 136 USPQ 458, 459 (CCPA 1963). See also MPEP §§ 2114 and 2115. Unless expressly noted otherwise by the Examiner, the claim interpretation principles in this paragraph apply to all examined claims currently pending.

11. The Examiner concludes that Applicant has decided not to be his own lexicographer by indicating and defining claim limitations to have meanings other than their ordinary and accustomed meanings. To support this position, the Examiner relies on the following factual findings. First and as noted in the previous Office Action,⁴ the Examiner has carefully reviewed the specification and prosecution history and can not locate any lexicographic definition(s). Second, the Examiner finds that not only has Applicant not pointed to definitional statements in his specification or prosecution history, Applicant has also not pointed to a term or terms in a claim (except for Applicant's discussion of "controller" in his Remarks) with which to draw in those statements.⁵ Third, after receiving express notice in the previous Office Action of the Examiner's position that lexicography is not invoked,⁶ Applicant has not pointed out the "supposed errors" in the Examiner's position regarding lexicography invocation in accordance with 37 C.F.R. §1.111(b) (*i.e.* Applicant has not argued lexicography is invoked). Finally and to be sure of Applicant's intent, the Examiner also notes that Applicant has declined the Examiner's

⁴ See the Examiner's previous Office Action mailed October 31, 2003, Paragraph No. 12.

⁵ "In order to overcome this heavy presumption in favor of the ordinary meaning of claim language, it is clear that a party wishing to use statements in the written description to confine or otherwise affect a patent's scope must, *at the very least*, point to a term or terms in the claim with which to draw in those statements. [Emphasis added.]" *Johnson Worldwide Assocs. v. Zebco Corp.*, 175 F.3d 985, 989, 50 USPQ2d 1607, 1610 (Fed. Cir. 1999).

⁶ See again the Examiner's previous Office Action, mailed October 31, 2003, Paragraph No. 12.

Art Unit: 3627

express invitation⁷ to be his own lexicographer.⁸ Accordingly and for due process purposes, the Examiner gives notice that for the remainder of the examination process (and unless expressly noted otherwise by the Examiner), the heavy presumption in favor of the ordinary and accustomed meaning is not overcome; the claims therefore continue to be interpreted with their "broadest reasonable interpretation" *In re Morris*, 127 F.3d 1048, 1054, 44 USPQ2d 1023, 1027 (Fed. Cir. 1997).⁹ The Examiner now relies heavily and extensively on this interpretation.¹⁰ Unless expressly noted otherwise by the Examiner, the preceding claim interpretation principles in this paragraph apply to all examined claims currently pending.

12. Under the broadest reasonable interpretation standard noted above and unless modified in this Office Action, the Examiner maintains his interpretations including the statements and/or definitions of claim limitations as noted in previous Office Action mailed October 31, 2003.

⁷ *Id.*

⁸ The Examiner's requirements on this matter were reasonable on at least two separate and independent grounds. First, the Examiner's requirements were simply an express request for clarification of how Applicant intend his claims to be interpreted so that lexicography (or even an *attempt* at lexicography) by Applicant was not inadvertently overlooked by the Examiner. Second, the requirements were reasonable in view of the USPTO's goals of compact prosecution, productivity with particular emphasis on reductions in both pendency and cycle time, and other goals as outlined in the USPTO's The 21st Century Strategic Plan, February 3, 2003 available at www.uspto.gov/web/offices/com/strat21/index.htm (last accessed July 10, 2004).

⁹ See also *In re Bass*, 314 F.3d 575, 577, 65 USPQ2d 1156, 1158 (Fed. Cir. 2002) ("In examining a patent claim, the PTO must apply the broadest reasonable meaning to the claim language, taking into account any definitions presented in the specification. Words in a claim are to be given their ordinary and accustomed meaning unless the inventor chose to be his own lexicographer in the specification") (citations omitted); *In re Etter*, 756 F.2d 852, 858, 225 USPQ 1, 5 (Fed. Cir. 1985) (en banc); and MPEP §§ 2111 and 2111.01.

¹⁰ See 37 C.F.R. §1.104(c)(3) which states in part: "the examiner may rely upon admissions by applicant . . . as to *any matter* affecting patentability [Emphasis added.]"

Those previous definitions are part of the administrative record and, in accordance with *In re Morris*, are provided simply as a factual source to support the Examiner's claim interpretations (and ultimately the Board of Patent Appeals and Interferences claim interpretations) during ex parte examination.

Response to Arguments

13. Applicant's arguments filed April 12, 2004 have been fully considered but they are not persuasive.

"Controller"

14. Applicant's disagreement with the Examiner's claim construction for the term "controller" is acknowledged. In particular, Applicant argues that "the Examiner's interpretation of 'controller' is too narrow"¹¹ Applicant cites to an additional dictionary definition. While this ordinary meaning may be the meaning relied upon by Applicant, the Examiner in this case is not required to use Applicant's meaning. "Absent an express definition in their specification, the fact that appellants can point to definitions or usages that conform to their interpretation does not make the PTO's definition unreasonable when the PTO can point to other sources that support its interpretation." *Morris*, 127 F.3d at 1056, 44 USPQ2d at 1029. In this case, the Examiner points to his definitions as noted in the Previous Office Action, (Paragraph No. 13), to support his interpretations.

¹¹ Applicant's "Remarks," Page 5, ¶4

Art Unit: 3627

15. As noted above, the Examiner concluded that Applicant is not his own lexicographer. In particular, Applicant has not successfully rebutted the “heavy” presumption of the ordinary and accustomed meaning for “controller.” In other words, “an inventor may choose to be his own lexicographer if he defines the specific terms used to describe the invention with reasonable ‘clarity, deliberateness, and precision.’” *Teleflex Inc. v. Ficosa North America Corp.*, 299 F.3d 1313, 1325, 63 USPQ2d 1374, 1381 (Fed. Cir. 2002) citing *In re Paulsen*, 30 F.3d 1475, 1480, 31 USPQ2d 1671, 1674 (Fed. Cir. 1994). “Vagueness and inference cannot overcome an ordinary meaning of a claim term . . .” *Northern Telecom Ltd. v. Samsung Elecs. Co.*, 215 F.3d 1281, 1295, 55 USPQ2d 1065, 1075 (Fed. Cir. 2000)(citations omitted).

16. In this case, Applicant has failed to specify a lexicographic definition with the required clarity, deliberateness, and precision and also has failed to make it clear that he intends deviate from the ordinary and accustomed meaning. See *e.g. In re Thrift*, 298 F.3d 1357, 1364, 63, USPQ2d 2002, 2006 (Fed. Cir. 2002) (“Although an applicant may be his own lexicographer, nothing in the specification defines the phrase ‘speech user agent’ differently from its ordinary meaning.”) (citations omitted); *Process Control Corp. v. Hydrex Corp.*, 190 F.3d 1350, 52 USPQ2d 1029, 1033 (Fed. Cir. 1999) (holding that the written description did not clearly redefine “the discharge rate” so as to put a reasonable competitor or one reasonably skilled in the art on notice that the patentee intended to so redefine that claim term); and *Abbott Labs. v. Baxter Pharm. Prods.*, 67 USPQ2d 1191, 1194 (Fed. Cir. 2003) “Because the patentee did not deviate from the accustomed meaning of the disputed claim term, the term ‘effective amount’ is construed in view of its ordinary and customary meaning” citing *CCS Fitness, Inc. v. Brunswick Corp.*, 288 F.3d 1359, 1366, 62 USPQ2d 1658 (Fed. Cir. 2002)). It is unclear if Applicant’s

Art Unit: 3627

proffered dictionary definition is his ordinary meaning or a lexicographic definition. Because Applicant has not successfully rebutted the "heavy" presumption, the Examiner concludes that Applicant has decided not to be his own lexicographer for the term "controller." Because Applicant is not his own lexicographer, the Examiner therefore relies on *Morris* and his cited definition for controller.

Functional Recitations

17. Applicant's amendments have essentially removed one functional term (e.g. "for") and replaced it with additional functional term(s) (e.g. "adapted to"). The Examiner's functional arguments therefore remain.

Prior Art

18. Applicant argues that "the present RFID system is long range, unlike the short range systems in the prior art." The Examiner has carefully reviewed claims 1 and 2 and can not locate 'greater than ten feet' within the claims. As Judge Clevenger has so eloquently summarized these types of arguments, "The invention disclosed in [Applicant's] written description may be outstanding in its field, but the name of the game is the claim." *In re Hiniker Co.*, 150 F.3d 1362, 1369, 47 USPQ2d 1523, 1529 (Fed. Cir. 1998).

19. Regarding Applicant's arguments that "the present invention is structured to begin authorization at an earlier time period than the prior art." Again, whether or not this is true is immaterial in light of the currently pending claims.

20. Applicant's remaining arguments have been considered but are not persuasive.

Conclusion

21. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 C.F.R. §1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 C.F.R. §1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

22. The following two (2) citations to the Manual of Patent Examining Procedure ("MPEP") apply to this Office Action: MPEP citations to Chapters 200, 700, 1800, and 2100 are from the MPEP 8th Edition, Rev 1, February 2003. All remaining MPEP citations are from MPEP 8th Edition, August 2001.

23. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).

Art Unit: 3627

24. Because this application is now final, Applicant is reminded of the USPTO's after final practice as discussed in MPEP §714.12 and §714.13 and that entry of amendments after final is *not* a matter of right. "The refusal of an examiner to enter an amendment after final rejection of claims is a matter of discretion." *In re Berger*, 279 F.3d 975, 984, 61 USPQ2d 1523, 1529 (Fed. Cir. 2002) (citations omitted). Furthermore, suggestions or examples of claim language provided by the Examiner are just that—suggestions or examples—and do not constitute a formal requirement mandated by the Examiner. Unless stated otherwise by an express indication that a claim is "allowed," exemplary claim language provided by the Examiner to overcome a particular rejection or to change claim interpretation has *not been addressed* with respect to other aspects of patentability (*e.g.* §101 patentable subject matter, §112 1st paragraph written description and enablement, §112 2nd paragraph indefiniteness, and §102 and §103 prior art). Therefore, any claim amendment submitted under 37 C.F.R. §1.116 that incorporates an Examiner suggestion or example or simply changes claim interpretation will nevertheless require further consideration and/or search and a patentability determination as noted above.

25. In accordance with the USPTO's goals of customer service, compact prosecution, and reduction of cycle time, the Examiner has made every effort to clarify his position regarding claim interpretation and any rejections or objections in this application. Furthermore, the Examiner has again provided Applicants with notice—for due process purposes—of his position regarding his factual determinations and legal conclusions. The Examiner notes and thanks Applicant for his "Remarks" (in the reply received April 12, 2004, beginning on page 5) traversing the Examiner's positions on various points. If Applicant disagrees with any additional factual determination or legal conclusion made by the Examiner in this Office Action whether

Art Unit: 3627

expressly stated or implied,¹² the Examiner respectfully reminds Applicant to properly traverse the Examiner's position(s) in accordance with 37 C.F.R. §1.111(b) in his next properly filed response. By addressing these issues now, matters where the Examiner and Applicant agree can be eliminated allowing the Examiner and Applicant to focus on areas of disagreement (if any) with the goal towards allowance in the shortest possible time. If Applicant has any questions regarding the Examiner's positions or has other questions regarding this communication or even previous communications, Applicant is strongly encouraged to contact Examiner Andrew J. Fischer whose telephone number is (703) 305-0292. If attempts to reach the Examiner by telephone are unsuccessful, the Examiner's immediate supervisor, Robert Olszewski, can be reached at (703) 308-5183. The fax number for facsimile responses is now (703) 872-9306.

Andrew J. Fischer
Patent Examiner
